

## CBCT GUIDED SURGERY

Protocol

### **QUESTIONS**?

TC Dental Laboratory 1000 NE 122nd Ave, Portland, OR 97230 1-800-926-5412 info@tcdentallab.com www.tcdentallab.com

#### **Q** LOCATIONS

San Diego, California 6440 Lusk Blvd d109, San Diego, CA 92121 Seattle, Washington 907 N 130th St, Seattle, WA 98133 Portland, Oregon 1000 NE 122nd Ave, Portland, OR 97230

PREP FOR THE PATIENT

#### Maxillary

#### Mandibular

**Upper & Lower Seperated** 

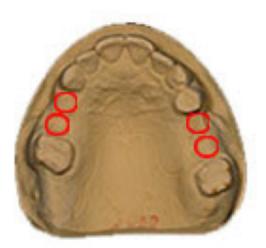

Scan Appliance Must Be Seated

Cotton rolls to separate the buccal and lingual. The patient MUST bite down the cotton rolls during the scan. If the patient has scan appliance, the scan appliance must be fully seated.

## 01

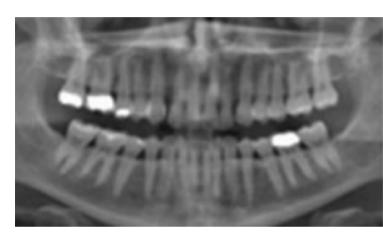

## PLANNING 1-4 IMPLANTS

Partially Edentulous

#### What to send to the lab:

- Maxillary and mandibular master cast or STL files and a bite registration.
- DICOM (Multi File, RAW, uncompressed a folder with 80 - 300 files with extension .dcm)
- \* when including immediate restorations, opposing and bite are required

less than 50% metal base

Scan appliance are required:

• Maxillary and mandibular master cast, or STL files and a bite registration (*if* restoring anterior teeth or 3-4 adjacent implants, send study model if available)

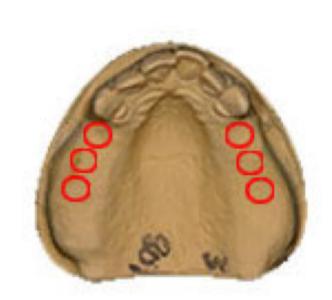

Doctor receives Scan Appliance and captures 2 CT scans (Dual Scan Technique)

**Scan 1** - Scan the Appliance alone sitting on 2 cotton rolls

Scan 2 - Scan the patient with Scan Appliance seated completely with no rock, biting on cotton rolls

More than 50% metal base

# RESTORING 5 IMPLANTS 0R MORE IN EDENTULOUS AREAS

Partially Edentulous Planning 5+ implants

#### Scan Appliance are required:

• Maxillary and mandibular master cast, or STL files and a bite registration (*if restoring anterior teeth or 3-4 adjacent implants, send study model if available*)

#### Doctor receives Scan Appliance and captures 2 CT scans (*Dual Scan Technique*)

**Scan 1** - Scan the Appliance alone sitting on 2 cotton rolls \*

Scan 2 - Scan the patient with Scan Appliance seated completely with no rock, biting on cotton rolls

# EDENTULOUS ARCH(S)

#### Denture must be prep for scan:

Edentulous Arch

- **Option 1** Place 6 Gutta Percha or composite points on the tongue side of the denture randomly in the pink area using #5 or similar bur to create a 1mm dimple.
- **Option 2** Call and order Radiopaque Markers from TC. Place six in sticky wax on the tongue side randomly.

#### Steps: Dual Scan Technique

Scan 1 - Scan the Appliance alone sitting on 2 cotton rolls \*

Scan 2 - Scan the patient with Scan Appliance seated completely with no rock, biting on cotton rolls

# ALL-ON-4 WORK UP PROTOCOL

Full extraction & placement

#### Steps:

#### 1.

- A. Base place and wax rim try-in to make sure the correct bite and Vertical Dimension. Teeth set-up for try-in.
- B. Scan(CT) the patient with wearing the denture set-up including radio graphic guided.
- C. Scan (CT) the denture set-up by it self. Upload DICOM / Photograph (*full face, full natural smile*)
- D. Send master casts, bite registration (*CO and/or CR*), and/or digital impressions, study casts
- E. Send MSGA Master Surgical Guide Agreement with first case (required to begin) Step 2

2. Schedule meeting with TC on line for implant and guide planning (allow 4 days after receiving all materials)

3. Sign and return the TPA Treatment Plan Report – via fax or scan and email.

4. Receive the GSI Surgical Information Form to order parts and review surgery – via email.

5. Receive guide (*TC will ship within 10 days of the signed TPA Treatment Plan Report*)
